

Coco AI

Coco AI is a fully open-source, cross-platform intelligent search and assistant system designed for modern enterprises. It provides a unified search entry point to connect heterogeneous internal and external data sources, integrates large language model capabilities, and empowers teams to access knowledge efficiently, make smarter decisions, and collaborate intelligently.

Find Marketing Solutions

From "Rummaging" to "Instant Results"

Switching between 5 platforms to find local files, cloud drives, or emails? With Coco AI, You Can: Enter "2025** Marketing Plan" and search across 20+ data sources simultaneously.

Unified Local & Cloud Search | Cross-platform, cross-data source, comprehensive results in one search.

Multimodal Support | Search and display for text, images, data, and more.

Digest 30-Page Reports in Seconds

From "All-Night Reading" to "AI Refinement"

Spending 3 hours reading a 30-page industry report? With Coco AI, You Can: Upload a file, automatically generate a summary + key data charts.

AI Summarization | Extract conclusions, trends, risk points.

Efficiency Toolchain | One-click export to PPT / Multilingual translation.

Team Knowledge Asset Accumulation

From "Document Swamp" to "Dynamic Knowledge Hub"

Project experiences scattered on personal computers, new members can't access them? With Coco AI, You Can: Meeting notes/project summaries automatically archived, data anonymized, shared with permission groups + AI Q&A.

AI Knowledge Steward | Auto-generate FAQs/Knowledge Graphs.

Secure Collaboration | Folder-level permission control

Instant Access to High-Frequency Tools

From "Multi-Click" to "Search & Go"

Writing a weekly report requires switching tools 5 times -- fragmented operations interrupt deep workflows. With Coco AI, You Can: Capture screenshots / Translate text / Adjust formatting with formatting assistant.

AI Command | Custom multi-step workflows.

Global Hotkeys | Bind hotkeys to commands/apps.

System Integration | Seamlessly invoke system functions like screenshot/system settings.

One-Stop Complex Tasks

From "Platform Switching" to "Integrated Collaboration"

Switching to GPT for copywriting, Claude for reading papers—Alt+Tab fatigue is real!

With Coco AI, You Can: Easily integrate mainstream models, configure dedicated data sources for each assistant, accurately complete complex tasks.

Bound Knowledge | Assign data to each assistant

Agent Matrix | Coordinate multiple assistants

MCP Protocol | Connect to the large model tool ecosystem.
